To Whom It May Concern,

I am writing to describe my positive interactions with Shore Western Manufacturing during the purchase and commissioning of a six degree-of-freedom shake table for my laboratory at the University of Florida. I purchased the system from Shore Western in 2012 to meet the needs of my experimental research in structural dynamics, structural control, and sensor technology development. Shore Western came up with a system design appropriate for my testing and experimental program. They delivered the table and commissioned it without any issues, and provided excellent training and support. The system has been running reliably ever since. I would not hesitate to buy from Shore Western in the future.

Sincerely,

A handwritten signature in blue ink that reads 'Jennifer Rice'.

Jennifer A. Rice, Ph.D.  
Assistant Professor
